

Box plot showing the number of species per 100 m² for the three species groups: Eq, Sc, and ML. The y-axis ranges from 3.95 to 4.05. A red dashed line is at 4.00. Eq has a median around 4.01, Sc around 4.005, and ML around 4.005. All groups show outliers below 3.95.

Box plot showing the number of species per 100 m² for three vegetation types: Equatorial forest (Eq), Savanna (Sc), and Montane forest (ML). The y-axis ranges from 3.94 to 4.06. A horizontal dashed line is at 4.00. The Eq group has a median slightly above 4.00, while Sc and ML have medians slightly below 4.00. Outliers are present for all groups.
